(Text/Memo)

- I thought Angela was an excellent TA. The discussion section helped me fully understand material and I thought each activity was relevant. I appreciated her genuine desire to help all of us and I felt as though she really cared and wanted us all to succeed. The Weekly worksheets were also very helpful and I appreciated them and thought they facilitated my learning. I don't think I would have done as well with a different TA
- I would love to have Angela as my TA again. I found it bothersome that the worksheets were mandatory, but then again it has helped me solidify my understanding of the readings.
- One of the most organized TA's I've had at UW. Angela did a great job explaining past, current and future topics, while connecting it closely to lecture. One of the nicest ladies I've met; yet, she knows how to control the classroom. She brings a welcoming smile and positive attitude to class everyday that gets the class in a better mood, in-turn making discussions amongst fellow classmates productive.
- I want to encourage this TA in all their future opportunities. It is rare to meet or work with someone who spends extensive time outside of class on the materials and learning styles of their students, as this TA clearly was doing. I found this TA to be extremely knowledgeable, flexible, and well prepared to handle a variety of topics and personalities.
- Angela always made us feel so comfortable in her section. I had struggles many times with technology and she was always so understanding and helpful. She encouraged us to share our views and never held a bias with hers. An explanation was offered each time someone was confused and she made sure to ask us if we ever needed further clarification. This was one of my favorite sections I have ever been in because the stress load was reduced with how organized she was and how much help was offered.
- I enjoyed this class!
- Angela is a fantastic TA who is very understanding and supportive of students, knowing that we are working hard. She leads interesting discussions that always have a twist to keep things fun.
- I appreciated her thorough understanding of the topics discussed, her preparedness for each discussion, as well as her ability to gather full participation from all members of the class. She encouraged us to get to know each other, making for a rich learning experience.

(Text/Memo)

- You create a really good atmosphere with discussions. The way you grade papers is also very fair, without being too easy or too harsh. Excellent TA
- Something that could be improved on is that she did try to plan the whole session and had many worksheets and tasks to accomplish which only gave us a couple of minutes to discuss confusing topics or interesting articles we read with either the class as a whole or just able to ask questions on readings.
- Angela is great
- Angela was a great TA. One of the nicest people I have ever met. I always felt welcome in her class.
- Angela is one of the nicest people I have ever met and she made our discussions very interactive and fun. She was very approachable and very helpful. She went above and beyond when it came to helping us with writing assignments and our final papers. Overall she did a fantastic job presenting the material and made difficult concepts easier to understand.
- A bit of a harsh grader but overall organized, positive and clear. Would like it better if discussions contained actual discussion not just going over worksheets/ activities
- Very good please hire again.
- I thought he grading was very harsh on short writings. I would take the suggestions on the prior assignments, apply them to the following, go to writing centers, create outlines, and still would get grades I wasn't overly proud of. However, Angela is very supportive and personable and really did want us to do better and wanted us to succeed
- Very good job. She knew the material very well and presented it well throughout discussion section. Gave good feedback on assignments and papers.
- I think she did a very good job of explaining material and answering questions that students had. I would definitely take a class with her again. She was very invested in making sure students did well and were successful in the class. I think that sometimes the worksheets were a little long and unnecessary, but overall it was a fun and interesting class.

papers reallycreate material assignments
 harsh good discussions

(Text/Memo)

- Awesome- thanks so much Angela!!
- During the review sessions I would rather just be able to ask you questions rather than my peers because sometimes have gotten incorrect or confusing information from others.
- Sometimes I didn't know why I got the grade I did, even if I went in and talked to her. This may been have because of the rubrics.
- She is doing great! I love her!
- Angela is extremely helpful and really hits on the points that are important. She does everything in her power to accommodate students.
- Angela is a great TA who leads discussions very effectively with examples and explanations discussed in lecture, but also her own outside examples. This teaching style helps to solidify the material because it provides extra ways to see and interact with the material. She also has a decent amount of group activities, which are useful to promote group discussion.
- Sometimes I think it is unclear what the TA wants out of writing assignments. I feel like they are assigned a grade and then you are given reasoning on how it should have looked, rather than how to do it in the first place. In general, I think the expectations for the writing assignments need to be made clear earlier in the semester.
- Discussion sections could be more time efficient

(Text/Memo)

- Angela is a great TA. She's probably the best one I've had in college as a graduating senior. She's very friendly and inclusive to everyone. She makes sure everyone gets a turn to speak, and she knows the material well. Walking into discussion each class you never know what activity we are going to do which makes it fun. She's always incorporating new ways to learn the material. She grades fairly. Great TA!
- Angela made the class easy to speak freely and I felt very comfortable answering questions and participating. Also she could explain course material very well and helped anytime I needed.
- She never showed us how to solve the problem even after she had us solve it. She only gave us the answers. So when taking the homework even though i attended discussion, i had no idea how to solve thr homework. She expected an advanced knowledge of physics not pertinent to the course.
- My TA was extremely helpful and understanding. The discussion sections made it easier to understand the concepts and material from the class.
- The grading was rather consistent throughout the year
- I think you did a great job at leading discussions and preparing us for exams.

Please make specific comments and suggestions.

(Text/Memo)

- Although consistency works well for people, maybe try different approaches to study questions. Counting off, breaking into a group and only answering that question before coming together as a whole is efficient, but gets boring.
- Amazing TA, really added a lot of depth that the lecturer didn't, and performed especially well even though the class had some hot heads
- Angela is reasonable and smart and makes discussion a comfortable environment to review material and discuss ideas. Angela gave helpful feedback for writing. Excellent discussion!
- This TA was very knowledgeable on the topics discussed in the class and was very helpful in explaining topics that were harder to grasp.
- Knows the material well and tries to help each student understand. I'm not quite sure that breaking into groups of 2-3 is very effective in discussing the material.
- Angela was a great TA and made learning this material a lot more interesting. She was a fair grader and gave suggestions that helped me improve. I got a lot more out of the course than I feel I would have if she hadn't been my TA.
- She is super nice and cares about her students. She really wants all of us to succeed which is great!
- Overall a great section to attend.

really class discussion gave helpful ta lot breaking more topics great

Please make specific comments and suggestions.

(Text/Memo)

- I loved having Angela as a TA! She constantly made adjustments to our discussion to ensure equal participants from students. Additionally, she presented quality examples that us students could easily relate to in order to understand key examples. She was also extremely helpful when meeting one-on-one. Overall, I would definitely recommend taking Sociology 210 with Angela to my friends!
- Very helpful and nice, lead good discussions
- Angela was extremely kind and provided help if needed. Her personable aura was necessary in light of the lack of care for students the Professor displayed.
- The grading for the writing assignments were very tough this semester. I don't believe the TA's have the same grading scales and expectations after talking to other students. I've heard other TAs being much easier on the grading for writing assignments.
- I enjoyed the small group then big group discussions on topic questions each week. Paper feedback was helpful and given back in a timely manner.
- 3 small things to change: 1) to waste less time maybe don't have us number off for groups every time because it wastes a couple minutes counting off and moving to groups... just have students gather with people around them. 2) grading on papers was kind of hard, especially since I heard other TAs grade differently and easier... 3) post grades on Canvas sooner so students know their grade But, overall thought you were a great TA and very sweet. Always willing to help students and prepared for lecture. I also thought it was nice how you brought snacks for speeches to sort of make it more of a relaxed setting, because speeches are the worst!! I also liked the handouts you gave in class because having paper copies of things is really nice. You will make a great professor if that is what you want to do some day :)
